

2008 Alternative Energy Expo & Electrathon

\$1500 Event level sponsorship

Equal recognition in all print and media contact with primary sponsors of Franklin PUD & CBC
This is a key and vital funding source used to promote and support the event as a whole throughout the year.

\$1000 Electrathon Event Sponsor

Top tier recognition for underwriting the Electrathon Rally event.
IE Sponsored by <Your name here> hosted by CBC & Franklin PUD.
Rights to include your name on trophies.
Rights to include your name in the rally name.

This is primarily a curriculum based high school team sport for young mechanical & electrical engineers of our future. Students

design, build an electric car and compete with other students from around the northwest. Electrathon America is a nationwide event. The object is to log as many laps as possible on a closed course track in one hour. This is a highly

competitive sport and a unique learning experience for students. This event is also a great crowd pleaser as exciting as any race event. An open class is also available for adults. As many as 40 cars come from all over the Northwest to test their design, build and execution skills on the race track. Check out their website: www.electrathonamerica.org

Electrathon

\$2000 Electrathon Car Sponsor

Provide a local school with the all parts they need to build and compete with their own Electrathon rally car.

Your name on the car as the sponsor.

These cars are often raced around the state and northwest expanding your exposure These cars frequently end up in television and newspaper coverage Cars are frequently displayed in public forums.

\$500 Solar car challenge booster

5th Grade students build and race model solar cars. Each year the event is attended by over 800 area students.

Cars are divided among students based on sponsorship funding, we would like to see one car for every willing student but to date the best we have achieved is 1 car per 4 students This booster level sponsorship is much needed and greatly appreciated by students and teachers. Often this is the first hands on solar experience for these students

<\$500 Solar car challenge booster or Event supporter

Will list with other sponsors on website, at the event.
